PROMPTS

Online Food Delivery Business Analytics System

Inspired by real platforms like
(Swiggy,Zomato, Uber Eats)

1. MASTER PROMPT: Explain Project Name & Dataset

You are a professional data analyst.

Explain the following SQL project:

Project Name: Online Food Delivery Business Intelligence & Performance Analysis Using SQL

Database Schema:

Table: customers
- customer_id (int)
- name (varchar)
- email (varchar)
- city (varchar)
- signup_date (date
-Gender

Table: restaurants
- restaurant_id (int)
- rest_name (varchar)
- city (varchar)
- cuisine
-rating

Table: order_item
-order_item_id
order_id
item_name
quantity
price

Table: orders

- order_id
customer_id
restaurant_id
order_date
order_amount
discount
payment_method
delivery_time (min)

Table: Delivery agents
- agent_id
agent_name
city
joining_date
rating

Now generate:

1. Meaning of the project name
2. Dataset explanation
3. Business model explanation
4. Analytical possibilities
5. Learning value of this project

Write in structured professional format suitable for a portfolio.

COMPLETE REPORT PROMPTS

1.

INTRODUCTION
Generate a professional Introduction section for this SQL Data Analytics project based strictly on the dataset and schema provided earlier.

Write 2–3 structured paragraphs covering:
- What the project is about
- Why the analysis is important
- How SQL was used
- Real-world relevance

Keep it portfolio-ready and professional.

2.

PROBLEM STATEMENT
Write a clear and professional Problem Statement for this project.

Explain:
- What business problem exists
- What questions needed to be answered
- Why solving these problems matters

Make it structured and impactful.

3.

BUSINESS OBJECTIVES
Generate 6–8 business objectives for this SQL analytics project.

MY PROJECT OBJECTVE IS THIS-[In this project, you will act as a Data Analyst for an Online Food Delivery company.
Your responsibility is to analyze the company's database using SQL and generate meaningful business insights that can help improve:

- Revenue performance
- Customer retention
- Restaurant growth
- Product performance
- Operational efficiency]

Make them measurable and aligned with:
- Revenue
- Customers
- Performance
- Operational insights

Use professional bullet points.

4.

DATASET OVERVIEW
Create a Dataset Overview section.

Include:
- Dataset description
- Tables involved
- Record size
- Time period
- Type of data stored

Keep it structured for a project report.

5.

ER DIAGRAM EXPLANATION
Explain the ER Diagram for this database.

Describe:
- Entities
- Relationships
- Cardinality
- Key constraints

Assume the diagram is visual but explain it clearly in text.

6.

Explain the following SQL query professionally:

[SELECT SUM(order_amount-discount) AS total_revenue
FROM orders;

- TOTAL REVENUE]

Structure:
1. Business Question
2. Tables Used
3. Business Insight Derived

7.

DATA ANALYSIS & INSIGHTS

Generate a Data Analysis & Insights section based on the key findings (**use images of result**)

Explain:
- Major trends
- Patterns
- Customer behavior
- Revenue distribution
- Performance insights

Write as if presenting to business management.

8.

PERFORMANCE OPTIMIZATION

Write a Performance Optimization section.

Include:
- Why indexing was important
- Query optimization techniques used
- Join efficiency
- CTE or temporary table usage
- Scalability considerations

Keep it technically strong.

9.

KEY FINDINGS SUMMARY
Summarize the top 8 key findings clearly and professionally.

Make them strong and business-impact focused

10.

BUSINESS RECOMMENDATIONS
Generate actionable business recommendations based on the findings.

Focus on:
- Revenue growth
- Customer retention
- Cost efficiency
- Operational improvement

Make them practical and realistic.

11.

CONCLUSION
Write a strong professional Conclusion section summarizing the overall impact of the project.

Make it concise but powerful.

12.

FUTURE SCOPE
Generate a Future Scope section.

Include:
- Automation possibilities
- Integration with BI tools
- Real-time analytics
- Advanced modeling opportunities
- Machine learning integration

Keep it forward-looking.
